

## KEEPING IT CLEAN & SIMPLE

“Since everyone is staying home more and using their homes for a multitude of purposes, people are looking at their spaces to be more structured yet comfortable at the same time. This new mindset allows them to feel productive when they need to be, but relaxed and laid-back when they just want to unwind from the day. A trend that’s here to stay? Clean lines, cozy textures, and classic furniture pieces that don’t clutter a space.”
